

AROZZI-SFERA MICROPHONE - BLACK

- The Sfera is designed to be easy to use yet with high-quality condenser capsules so the audio is crisp & clear. It is tailored to be the optimal fundamental streaming microphone that is ideal for gaming, online calls, and podcasts. The Sfera has a strong & heavy base to keep it stable where ever you place it. The cast metal is 0.8kg (1.8 lbs) with a coated rubber bottom to ensure its placement on your desk. The Cardioid pick-up pattern is ideal for individual use, picking up the audio from the front of the microphone and not the back. This enhances the recorded audio by excluding any irrelevant noises behind the microphone. If you have a full streaming setup, cables can run everywhere if unorganized. The Sfera has a cable management clip attached so the cable stays tightly connected to the microphone's stand. No room on your desk for the Sfera

- Attach it to a boom arm with the 5/8-inch thread mount so you can have more room on your desk.
- Plug & Play easy to use
- Boom arm attachable
