

One for all! Whether tiles, masonry, wood, metal or plastic: the robust Multi-Construction drill bit gets through thick and thin thanks to its multiple diamond-ground tungsten-carbide cutting edges. When impact-drilling, it can even take on concrete.

The right tool for any challenge.

No matter what challenge you want to tackle, we have the right impact drill for you. From the GSB 13 to the GSB 90: each one of the six tools is a master of its class.

Specifications	GSB 13 RE	GSB 16 RE	GSB 18-2 RE	GSB 20-2 RE/RCE	GSB 22-2 RE	GSB 90-2 E

Handier than any other.

The Impact Drill GSB 13 RE Professional: no bigger than a glove and weighs only 1.6 kg. It is, therefore, setting new standards in compactness and weight. It also impresses with its powerful 600 Watt motor. This means that you can drive screws and drill powerfully where other impact drills cannot reach.

The Impact Drill GSB 13 RE Professional does a great job. Whether in masonry, wood, steel or concrete: the high-quality and robust metal quick-change chuck masters even the most demanding jobs without any problems. The rotatable brush plate ensures that the same power is provided in forward and reverse operation. And thanks to the ergonomic soft-grip, you always have a firm grip on the GSB 13 RE Professional. What's more, it is so light-weight and balanced that it can be comfortably operated with one hand.

Handy does not mean low power: the GSB 13 RE Professional drills in masonry as powerfully as a large drill.

Lots of power does not necessarily need lots of space: the GSB 13 RE Professional shows its extraordinary strength even in hard-to-reach areas.

The handiest in its class.

The GSB 13 RE Professional.
