- Notes: \*1 The trip action characteristics differ between AC and DC for products that are compatible with both AC and DC.  
 \*2 It is attached with the alarm switch.  
 \*3 In case of a current rating of 100A, it does not specify NK rating.  
 \*4 Use two poles for three- and four-pole products. In this case, do not use the neutral pole of the four-pole products. If wired as shown on the right, three and four poles can be used for up to 400 and 500VDC, respectively.  
 \*5 The standard lead drawing is performed laterally. Load drawing is also available.  
 \*6 The cassette type design makes it easy for customer to install. Available for installation on side below 250A frame (excluding UVT).  
 \*7 Use two poles for three- and four-pole products. In this case, do not use the neutral pole of the four-pole products. Not available for use with connection as shown on the right.  
 \*8 Place an order of other models in conjunction with the circuit breaker.  
 \*9 Solid state relay output is option. Please specify if other output is necessary. (Standard type is thus SLT equipped).  
 \*10 Not isolation compatible, excluding 400 to 800A frame.
