

IR Remote

Product and Installation Guide

www.mux.life

Product Overview

Mux IR Remote is a Wi-Fi enabled smart device, which allows you to control your remote controlled devices such as TVs, Air Conditioners, Projectors, and Sound systems etc. via the Mux Life App. Additionally you can set timers, apply schedules and control the devices via virtual assistants. Detailed statistics help you monitor the usage of your devices.

Features

- Add upto five remote control devices at a time
- App Control
- Voice Control (compatible with Amazon Alexa and Google Assistant)
- Smart Scheduling and Automation
- Timers
- Smart Scenes
- Real time status notification
- Remote Management

Installation

Plug in the IR Remote with 5V adapter into the socket and look for the LED status.

For LED status, see the table.

Side View

Product LED Status

LED Light	LED Status	Wifi Status	Description
Green Light	Fast Blink (< 0.5 sec)	Device in Broadcast (reset) Mode	You can add this device into your Mux Life account.
	Slow blink (1 sec)	Device connected to Wi-Fi but has no internet access	Check internet connection on the Wi-Fi Router where the device is connected.
	Stable	Device correctly configured	Device can perform all actions.

Reset Device

To put the device in reset mode, press and hold the reset button on the device for 6 seconds (until the green LED starts flashing). The device is now in the reset mode. You can now add the device in your Mux Life account.

App Download

Download the Mux Life App from the Google Play / App Store or scan the QR code.

App Setup

Scan the QR code to watch an installation video to setup Mux Life App.

Caution

- Do not put the IR remote in wet places.
- Do not use an adapter more than 5V.
- Make sure that there isn't any obstacle between IR Remote and appliance (it should be in line of sight).
